

**Land for
"THE INDUSTRIAL PARK "OLEKSANDRIYA"**

ENGINEERING NETWORKS

Electricity supply

The transformer substation 110/35/10 kW (coordinates 48.669660, 33.145636) with a capacity of 100 MW is located at a distance of 200 meters from the boundary of the site. Available reserves of power allow to fully all necessary needs of IP power supply.

Gas supply

The network of high-pressure, medium-low and low pressure gas pipelines in Oleksandriya is served by the Oleksandriya management of the gas operation of OJSC "Kirovohradgas".

The gas pipeline with a diameter of 219 mm passes along Dnipropetrovsk highway.

There is a real possibility to create a medium pressure gas pipeline by removing it from a gas distribution station located at a distance of 2300 m. from the site. That is, for gas supply to the industrial park it is necessary to lay the gas pipeline according to the ordered project.

Sewerage

The territory of the industrial park is provided with a system for removing unsightly domestic and industrial waste - collectors (D-1000 mm). Nowadays, for their proper explanation, it is necessary to carry out repair and restoration works.

Water supply

On the territory of the industrial park there are plumbing networks D-500 mm, which can be used for water supply of the park's infrastructure objects.
